THERE IS A "CATERPILLAR" DEALER NEAR YOU

Foreword

“Caterpillar” products are a combination of advanced engineering, skilled manufacturing, and the finest materials metallurgical science can select. Thousands of satisfying, economical working hours are built into each machine.

Whether or not the owner derives the maximum of service from his machine depends largely on the care exercised in its operation and maintenance. This book is written to give the operator essential information regarding the day-to-day operation, lubrication and adjustment of the machine. Careful adherence to these instructions will result in assured economy.

A great many “Caterpillar” owners depend upon their dealer for service other than the care and adjustments described in this book. This practice is recommended because our dealers are equipped with factory-trained servicemen, tools designed and built by “Caterpillar”, and stocks of genuine “Caterpillar” parts. Moreover, they are kept closely informed by the factory regarding advanced methods of servicing “Caterpillar” products — thus, in all ways, they are equipped to render the best of service.
