PARTS ORDERING & PRODUCT SUPPORT

Use only genuine Caterpillar parts in the maintenance, rebuild, or repair, of Caterpillar machines. Caterpillar shall have no liability as to any unauthorized modification of machines or parts and shall have no obligation or liability as to any machines or parts which have been improperly handled, or which have not been operated, maintained, or repaired according to Caterpillar's furnished manuals, or other written instructions, or which are operated with other than genuine Caterpillar parts.

Your cooperation in furnishing as much information as possible will assist us in filling your orders correctly and in the shortest possible time.

1. IDENTIFICATION OF THE MACHINE

Always furnish the **CATERPILLAR** Model Number and Serial Number when ordering parts.

This information is found on the machine nameplate. Rock Drills have the serial number stamped on the cylinder.

2. PART NUMBER AND DESCRIPTION

In addition to the Serial Number, always give the part number and description of each part ordered. If there is any doubt as to the correct part number and description, furnish a dimensioned sketch or return the part to be replaced, transportation charges prepaid.

3. SHIPMENT

Unless otherwise instructed, all shipments will be made via motor freight collect or "UPS" prepaid and charged on our invoice. Shipments cannot be made on open account until your credit has been approved by our Accounting Department.
