

EXPERIENCE AND QUALITY YOU CAN MEASURE

## IDENTIFY WASTED ELECTRICITY

The new PMT—AC Load Surveyor will provide data to:

- find potential motor burn-outs
- spot possible power outages
- identify ways to maximize efficiency on motors and circuits for power factor correction
- target oversized motors to eliminate wasted energy
- prove that costly rewiring is not really needed

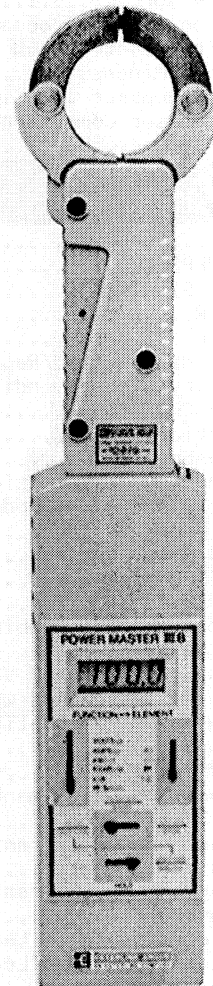

This tool measures: inrush current, kWh, demand, power factor, kwatts, kvars, voltage, current and kVA.
